- o EPOS Office Back Office Software

Applications

- o Bar
- o Catering
- o Quick Service
- o Cafe
- o Retail

LX5600 Specification

LX5600 - Benefits:

Cash Control: At the end of each shift the financial report clearly identifies the value of money that should have been taken by each method of payment - this is used to reconcile against the actual cash in drawer.

Sales Analysis: The LX5600 allows you to monitor your sales mix, products can be linked to 10 main groups (Wet, Dry etc) and 64 sub groups (Bottle Beer, Draught Beer, Spirits etc). In addition products can be linked to a further 25 groups which could be used to track product sales by supplier.

Operator Analysis: Individual operator performance (up to 32) can be monitored allowing you to keep an eye on the most productive staff and those making the most "mistakes". Up to 4 commission rates can be used providing managers with a way of giving incentives to operators.

Stock Control: Stock control comes as standard allowing you to enter an opening stock level. The stock report shows you what your current stock position is, this can be compared to a physical count thus highlighting any shortfall.

Automate End of Day Routines: End of shift / day routines can be simplified by using one of the 4 arrangement buttons which allow you to setup a macro to automate key sequences.

Promotions: Two % adjustment buttons allow you to run in house promotions and even a simple customer loyalty scheme. The adjustment feature allows you to give a customer a preset % discount of pre selected items.

Scanning: With an optional scanner attached, the LX5600 has the facility to register bar-coded items.

Security: All reports, programming options and sensitive operations are available under key lock control.

Simple Food Ordering: In a pre payment food operation an order number or table number can be entered with a transaction, orders can be sent to kitchen printers with different products being printed on different kitchen printers. Up to 4 kitchen printers can be used e.g. starters, mains, drinks.

System Features: The LX5600 comes network ready, it can be connected with up to 7 other terminals providing consolidated reporting across the entire system. In addition the LX5600 is also PC ready and can be connected to back office PC for simplified programming and reporting.
